

The currency pairs are: USD/CHF, EUR/CHF, AUD/USD, NZD/USD, EUR/GBP, EUR/JPY, GBP/JPY, CHF/JPY, GBP/CHF, EUR/AUD, EUR/CAD, AUD/CAD, AUD/JPY, EUR/USD, USD/JPY and GBP/USD.

MetaStock Pro FX includes a trade link with FX brokers for populating all your trade information on their trading platform providing ease and speed when placing trades.

The MetaStock Pro FX symbol database displays the FOREX pairs and does not include any of the volume indicators since volume is not available from the FOREX market.

MetaStock Pro FX offers the most powerful money-

### Why Trade FOREX?

FOREX is short for the Foreign Exchange markets where the world's currency is traded.

Here's why FOREX trading is so popular.

1) The FOREX market is the most liquid market in the world. This lets you get in and out at the price you want.

2) The FOREX market is open 24 hours a day, 5.5 days a week. Trade when you want.

3) You have a high

leverage ratio in the FOREX market. This means you can capture large profits with a smaller amount of capital than other markets.

4) You can expect a high level of fluctuations during the trading day in the FOREX market so you'll have more trading opportunities.

5) No overnight gaps. This is a traders nightmare in other markets, but no worries in the FOREX market.

making tools to help you find better trading opportunities, no matter your experience level. It has the ability to reduce the profit-killing emotions of greed and fear from your trading.

## Here's how MetaStock Pro FX's power tools can help you trade the FOREX markets!

**System testing**— Test multiple trading systems on multiple currency pairs. You'll get buy and sell signals based on the trading system that best matched that security. These signals free you from harmful emotions that influence your trading decisions.

**Pre-built trading systems** —Immediately start system trading with MetaStock's large library of built-in trading systems! You'll find these systems easy to use and very reliable. Additional systems are available for purchase.

**Scanning & filtering** — Scan thousands of currency pairs to find prime trading opportunities. This screening occurs in the background, freeing your computer for other tasks!

**Expert advice** — A library of experts will help you with your specific trading situation, will identify trends, highlight price bars, place symbols, set alerts, and identify 31 different candlestick patterns.

**Indicator library** — Over 200 built-in indicators and line studies ensure you will find the indicators that work best with your trading style. This collection includes over 80 indicators for Broad Market analysis.

**Flexible charts** —Crisp currency charts are automatically saved. Or save your charts as Templates or Layouts.

Mr. Fancher has had phenomenal success with MetaStock Professional. Here are just a few of his comments about his experience with MetaStock Pro taken from an interview performed earlier this year.

"It was simple, it was just so simple. I'd ask people if they can follow instructions. If it says buy, if you can read that, you buy. If it says sell, if you can read that, you sell. It's just that simple."

"One of the most significant things I found about MetaStock was the Enhanced System Indicators. Out of 200 indicators, it pulls out the top five for the type of trading I am doing and it tells me what the top five are to make the most money. Those indicators consistently pull out the best trades in the market for me to trade."

"MetaStock employees, the home office, I have been thoroughly impressed. I've been a business man for 25 years, self employed and very few times have I ever come across a company that had the home office support. The willingness and ability to help has never changed."

"The success I've had with MetaStock has just overwhelmed me. I just never expected this kind of success. I never expected that I could take \$5,000 and live off of it. I can look at this software and just see

everything, the direction of the market, the strength of the trade. It's just that easy."

"My sister bought a software program for just over \$5,000 that doesn't even compare to MetaStock."

"There were about 40 people in the group who had bought the other software. When I bought the MetaStock software, I introduced it to all of them. Many of them bought it and still have it, haven't turned back and are making money with it."

"If I can learn to use MetaStock in a 3 hour period, I think anybody can learn to use it. I think that certainly with a little support form technical support you can learn to use it because that's where I got my help."

"I strongly suggest that until you take a look at MetaStock, do not commit to those other companies. At least give yourself a chance to look at what I think it the best software on the market."

"If you're thinking at all about being in the Market, Stock Market, New York Stock Market, NASDAQ or the Foreign Exchange Market, you need MetaStock Pro!"

"MetaStock does it all and it costs half as much as one of those other software packages."

**"The success I've had with MetaStock has just overwhelmed me... I can look at this software and just see everything, the direction of the market, the strength of the trade. It's just that easy."**

Announcing the MetaStock way to trade the FOREX market— MetaStock Pro FX!

MetaStock Pro FX is the real-time version of MetaStock Professional, specifically created for FOREX trading!

MetaStock Professional has been helping real-time investors make better trades for over five years.

It's been selected as the best analysis software by the readers of Stocks and Commodities magazine for the past three years. And now it is offered in a version designed for FOREX traders.

You'll find just the tools you need to get amazing FOREX buy and sell signals with MetaStock Pro FX.

We conducted numerous interviews with active FOREX traders to discover the tools and techniques they use to make better FOREX trades. This information led us to create the best tools and functions you will need to trade today's FOREX market.

In MetaStock Pro FX, you'll get the chart set-ups FOREX traders use most. You can apply the same analysis, create the same trading systems and use the same time increments. You'll also have pre-built templates that make your FOREX trading much easier.

With MetaStock Pro FX, you'll have the symbol database of the FOREX pairs in real-time. There are 17 FOREX tailored layouts of currency pairs that come pre-built with MetaStock Pro FX.

MetaStock also gives you nine charting styles to choose from including bars, lines, candlesticks, candlevolume, eqivolume, kagi, renko, three line break, and point & figure.

**Powerful indicator builder** — Custom-create your own trading systems and indicators. Writing the formulas is as easy as picking the functions you need from a wide array of math and investing functions to save you valuable time.

**Additional modules**— MetaStock works with outside software modules. There are over 13 plug-ins and add-ons.

**Free technical support**— You'll always find a friendly technical support representative ready to help solve your problem. You can call, send an email, or contact them through chat. And best of all, this service is FREE to our registered MetaStock customers.

## The Built-in FOREX Trading Systems

**The FX Multiple Time Frame System** — This system allows you to get a “top down” view of a FOREX currency pair for easy decision confirmation.

Start with the daily time frame, and then move through the other charts until you end up with the 5 minute chart. You'll see if every time frame is giving you the same trade signals. If they are, it is a strong confirmation.

This system has two experts and one template. This template replicate the favored screen layout of many of the FOREX traders we interviewed. This template is divided into five charts. The daily, 60 minute, 30 minute, 15 minute and 5 minute charts have an 8 period RSI. These charts also have the FX Multiple Time Frame

Trend Expert attached.

In addition, the 5 minute chart has a 50, 12 and a 3 period Exponential Moving Average.

This Multiple Time Frame system uses multiple time frame charts to determine trends with a currency pair. This is an intraday system whose signals are generated on a 5 minute chart. It uses the Relative Strength Index for

the buy or sell signal and the MACD and Moving Averages to confirm the signal.

With the 60 minute, 30 minute and 15 minute charts, you'll get a green up arrow if the trend is up and a red down arrow if the trend is down. The 5 minute chart is the trade signal chart. It is the one that will display buy and sell symbols on the chart and generate alerts.

**The FX Keltner Systems**— Keltner Channels are recognized as a proven tool for analyzing the FOREX markets by many FOREX traders. This system gives you two sensational ways for you to use Keltner Channels in your analysis.

There are two FX Keltner Systems, FX Keltner System 1 and FX Keltner System 2. Obviously, these two systems use Keltner Channels as their primary method of triggering signals.

Keltner System 1 is composed of a Template and an Expert. It looks for specific patterns that occur on a very infrequent basis. When signals occur, they are usually followed by sharp moves. The Template displays a Price Oscillator, an ADX, and Keltner Channels when the FX Keltner System 1 is attached.

Keltner System 2 is also composed of a Template and an Expert. It looks for specific patterns that occur on a more frequent basis. The Template displays a Price Oscillator, an r-squared indicator and Keltner Channels when the FX Keltner System 2 is attached.

**The FX Pattern System**— The FX Pattern System gives revealing buy and sell signals. Many FOREX traders use this methodology as part of their analysis strategy.

The FX Pattern System is another system popular with many FOREX traders. It combines Bollinger Bands, Standard Error Bands and a Stochastic Oscillator in a way that gives FOREX traders revealing buy and sell signals. Many FOREX traders use this methodology as part of their analysis strategy.

This is composed of a Template and an Expert and uses

Bollinger Bands, Standard Error Bands, and a Stochastic Oscillator to generate buy and sell signals and alerts. The Template displays Bollinger Bands, Standard Error Bands, and a Stochastic Oscillator.

QuoteCenter's powerful FOREX data combined with MetaStock Pro FX is the best FOREX trading combination you'll ever find.
